PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience in Python and PHP, specializing in Django and Laravel. Skilled in developing RESTful APIs and testing them using Postman. Experienced in building responsive web applications and working with relational databases like MySQL and PostgreSQL. Focused on writing clean, scalable code and delivering efficient, user-centric solutions.

TECHNICAL SKILLS

Languages: Python, PHP, HTML, CSS, JavaScript

Frameworks: Django, Django REST Framework, Laravel, Bootstrap, jQuery

Databases: MySQL, PostgreSQL, SQLite

API & Tools: RESTful API Design & Development, JWT Authentication, JSON, Postman, API Testing & Integration

DevTools & Version Control: Git, GitHub, Django Admin Panel, VS Code

Architecture & Patterns: MVC (Laravel), MVT (Django), OOP, CRUD Operations

Security & Access: RBAC, Laravel Middleware, Django Permissions, JWT Token Auth

Soft Skills: Time Management, Teamwork, Communication, Problem Solving, Leadership, Adaptability

EXPERIENCE

Junior PHP Developer (Trainee)

June 2025 - Present

Fortigrid ICT India private Ltd Coimbatore

- Developed responsive web pages using HTML, CSS, Bootstrap, and JavaScript
- Built and tested backend features using PHP and Laravel, implementing MVC architecture and clean code principles.
- Integrated Laravel Blade templates with reusable components and layouts to streamline frontend-backend communication.
- Designed MySQL database schemas and implemented full CRUD operations using Laravel Eloquent ORM for efficient data handling.
- Utilized Laravel Artisan CLI to generate controllers, models, migrations, and seeders, accelerating development workflow.
- Implemented Laravel middleware for request filtering and authentication checks, ensuring secure and controlled access across all application routes.
- Configured role-based access control (RBAC) using Laravel Gates, Policies, and Laratrust package to manage user roles and permissions at both route and model level.
- Applied Laravel's built-in authentication scaffolding for secure user login, registration, and session management.
- Applied Laravel Form Request validation classes for clean, centralized input validation across all modules.
- Contributing to an internal HRMS project focused on employee management, attendance tracking, and HR workflow automation.
- Preparing for production-level development by following industry best practices including code reviews, MVC structure, and clean architecture principles.
- Collaborated in code reviews and team discussions to maintain code quality and consistency across the project.

- Designed responsive UI with HTML and CSS, ensuring a seamless user experience.
- Developed and integrated RESTful APIs for efficient data exchange between frontend and backend.
- Designed and managed database models and migrations with Django ORM.
- Utilized Django admin panel for efficient data management and testing.
- Completed practical training covering the full Python full stack development lifecycle including frontend design, backend development, API integration, and database management.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Application - V V College of Science and Technology	July-2021 - March 2024
Certification in Python Full Stack Development Camerinfoiks Pvt. Ltd., Kakkanad	October 2024- March 2025

PROJECTS

Django Microservices E-Commerce System	github.com/Ajil77/Ecommerce-microservice
--	---

Tech Stack: Python, Django, Django REST Framework, PostgreSQL, JWT, Razorpay, HTML, JavaScript, REST APIs

- Architected a microservices-based e-commerce backend with independent Cart, Order, and Product services communicating via REST APIs.
- Implemented JWT authentication and authorization using SimpleJWT for secure, token-based API access control.
- Built cart management features including add/remove items, quantity updates, and dynamic total calculation.
- Created an order processing workflow with checkout functionality.
- Integrated Razorpay payment gateway for online payment processing and transaction verification.
- Managed inter-service communication using the Python Requests library following scalable microservices principles.
- Developed frontend pages using HTML, Bootstrap, and JavaScript for product listing and cart management.
- Conducted thorough API testing using Postman, covering authentication flow, error handling, and service integration.

HRMS Web Application

Tech Stack: PHP, Laravel, MySQL, HTML5, CSS3, Bootstrap

- Developed HRMS features with role-based authentication and employee management.
- Worked on the Leave Management Module for leave requests, approvals, and balance tracking.
- Developed the Attendance Management Module for check-in/check-out and attendance reports.
- Used Laravel Eloquent ORM to manage employee, leave, and attendance data.
